CENSUS OF MERCHANDISING AND SERVICE ESTABLISHMENTS

RETAIL MERCHANDISE TRADE IN ONTARIO, 1941.
(Preliminary Report)

Retail sales in Ontario totalled \$1,368,278,700 through 45,453 stores in 1941 according to preliminary results of the Census of Merchandising and Service Establishments. Payroll to full-time and part-time employees, but exclusive of proprietors' earnings, amounted to \$125,874,200 during the year while inventory value as on December 31, 1941 was reported at \$195,327,800.

The Census of Merchandising and Service Establishments forms part of the Decennial Census of 1941, and is the second complete survey of retail trade to be taken in Canada. The previous census of trading establishments related to the year 1930, when retail sales in Ontario amounted to \$1,099,990,200. Dollar sales in 1941 were 24 per cent higher than in the earlier period.

The scope of the 1941 Census of Merchandising varied slightly from that of 1930, figures for the earlier year including certain minor types of business not included in the regular retail tables of the 1941 Census. The types of business omitted in 1941 consist chiefly of producer-distributors of milk products and certain agencies having no established place of business. On excluding figures for these types from the 1930 totals an increase of approximately 9 per cent in number of stores is recorded between 1930 and 1941, while the increase in dollar volume of business is raised to approximately 25 per cent.

For census purposes retail stores are divided into various kind-of-business classifications, these classifications depending partly upon popular designation and partly upon the kind of commodities handled. The individual kind-of-business classifications are then combined into ten major groups. Included in the total figures for 1941 were 13,366 stores classified broadly as belonging to the food group and including those types of outlets such as combination stores, grocery stores, meat markets, etc., which deal chiefly in food products. These stores had sales of \$305,283,300 in 1941, an increase of 19 per cent over the corresponding figure for 1930.

Comparisons of the figures for individual kind-of-business classifications between the two years are distorted in some instances by changes in definition and methods of classification. They are also affected by changes in the nature of the business transacted by certain stores, changes which may develop gradually or occur suddenly and which may require the transference of the store in question from one kind-of-business classification to another. Some stores transact business on both a wholesale and retail basis and only those stores whose business is transacted chiefly on a retail basis are included in the Retail Section of the Census. Establishments operating chiefly at wholesale are included in the Wholesale Section. Slight changes in the relative proportions of retail and wholesale business transacted by certain firms may have necessitated their transference from one section of the Census reports to another. Changes in number of stores and value of sales between the two Census periods for individual lines of business, as shown in the accompanying tables, must be interpreted in the light of these factors.

Included in the food group of stores for 1941 were 5,391 grocery stores with sales of \$83,153,200, a decline of 16 per cent below the 1930 figure. On the other hand there was a marked increase of 95 per cent in the value of business of stores selling both groceries and fresh meat and classified as combination stores. There were 2,608 such stores with \$144,796,900 sales in 1941 compared with 2,114 stores and \$74,373,000 sales in 1930. Stores specializing chiefly in meat products only and classified as meat markets declined in number from 1,539 in 1930 to 1,305 in 1941. Sales for this category declined by 14 per cent from \$32,072,000 in 1930 to \$27,681,300 in the year under review. Combined figures for grocery stores, combination stores and meat markets showed an increase of 25 per cent between the two years.

There were 2,483 stores classified as country general stores in Ontario in 1941 and these had sales of \$43,544,700, practically unchanged from the volume of business transacted by 2,550 such stores in 1930. Country general stores are defined as stores carrying a general line of merchandise and located in places of less than 2,000 population. Food products are usually sold in these stores but if the sale of such products amounted to as much as 80 per cent of the total business, the store is classified as a grocery store rather than a country general store.

Department stores, variety stores and other stores selling a general line of merchandise are assigned to the general merchandise group in the Census scheme of classification. There were 1,268 such stores in 1941 with sales of \$207,365,100, up 12 per cent above the volume of business transacted by 1,091 stores in 1930. As previously stated these figures include department stores, variety stores and general merchandise stores in places of over 2,000 population. They also include the business done by mail-order houses or offices. It should be noted that the Census of Merchandising is taken on an establishment basis and that mail-order sales are attributed in their entirety to the location of the office where the order was placed rather than being spread over the much wider territory from which that business was drawn. The total figures for the General Merchandise Group include 448 variety stores with sales of \$38,147,300 in 1941, up 94 per cent over the business transacted by 221 stores in 1930.

There were 6,844 establishments engaged in some phase of the automotive trade and, therefore, assigned to the automotive group of stores. These firms had sales of \$258,961,400 in 1941, up 55 per cent over the business transacted by 5,405 establishments in 1930. Included in the totals for 1941 were 997 motor vehicle dealers with sales of \$156,029,100, an increase of 42 per cent over the corresponding period for 1930. There were 4,312 filling stations in Ontario with sales of \$74,319,300, up more than 100 per cent over the business transacted by 2,754 filling stations in the earlier Census period. There were also 1,033 establishments classified as garages in 1941 with sales of \$15,659,900, down 2 per cent from the earlier year. The garages included here are establishments combining repairs with the sale of gas, oil, accessories and equipment and where receipts from repairs and other services amounted to less than one-half of the total business. When revenue was reported as being derived chiefly from repairs, the establishment was assigned to the Service Section of the Census rather than the Merchandising.

The apparel group of stores included 4,910 establishments with sales of \$120,479,100, up 29 per cent over the business transacted by 4,484 stores in 1930. This group is divided into four main sub-divisions. Stores specializing in men's clothing and furnishings gained 13 per cent in sales between 1930 and 1941, women's specialty shops were up 37 per cent while stores carrying both men's and women's wear and classified as family clothing stores increased their business by 51 per cent. There were 471 such family clothing stores in Ontario in 1930 with sales of \$14,882,300 compared with 590 stores and \$22,428,700 sales in 1941. The apparel group also included 781 specialty shoe shops with sales of \$20,225,500 in 1941, a gain of 25 per cent over the volume of business transacted by this type of store in 1930.

There were 2,002 establishments assigned to the building materials group with \$67,169,900 sales in 1941, up 8 per cent over the volume of business for this group in the earlier census. Hardware stores form the most important classification within this group. There were 1,090 hardware stores in Ontario in 1941 with sales of \$26,855,700, a decline of 3 per cent below the volume of business transacted by 1,135 hardware stores in 1930. There were also 360 establishments classified as lumber and building material dealers and these had sales of \$28,830,700 in 1941, a gain of 31 per cent over 1930. These figures relate only to retail places of business, where manufacturing activities are not carried on. They do not include saw mills, planing mills or other establishments combining the sale of lumber and building materials with manufacturing operations. Such establishments are included in the Census of Industry rather than the Census of Merchandising and Service Establishments.

Firms or stores dealing chiefly in furniture, household appliances, musical instruments or other household requirements and included in the furniture-household appliance-radio group numbered 1,468 in 1941 with \$51,442,300 sales, up 19 per cent over the volume of business transacted by 1,387 firms in 1930. Included in the total figures for 1941 were 526 furniture stores with \$25,872,500 sales, up 44 per cent over the earlier Census year. On the other hand, stores specializing in household appliances, radios, musical instruments or a combination of these commodities declined slightly in value of business between the two years.

Conforming with the results for other provinces, a marked gain was recorded in the restaurant group. There were 3,523 establishments classified as restaurants in 1941 with sales of \$50,887,400, up 78 per cent over the \$28,633,600 sales reported by 2,506 restaurants in 1930. Other important lines of business for which figures are shown in the accompanying tables include drug stores of which there were 1,698 in 1941 with sales of \$48,079,900, up 37 per cent over the business transacted by 1,464 drug stores in 1930. Retail coal and wood yards, including natural ice dealers, numbered 1,061 in 1941 with sales of \$50,612,800, up 7 per cent over the volume of business transacted by this type of establishment in the preceding Census year. There were 616 jewellery stores in 1941 with sales of \$16,604,900 or 46 per cent more than the volume of business for this trade in 1930. Stores dealing chiefly in tobacco products and classified as tobacco stores or stands numbered 1,860 in 1941 with sales of \$21,412,100, up 39 per cent over the business transacted by 1,290 such stores in 1930. Sales of government liquor stores declined by 5 per cent from \$34,764,300 in 1930 to \$32,937,100 in 1941.

Chain Stores

The proportion of the total retail trade of Ontario transacted by chains increased slightly from 20.3 per cent in 1930 to 21.6 per cent in 1941. There were 3,357 units of chain companies operating in the province in 1941 and these had sales of \$295,401,500, while in 1930 there were 3,269 chain store units with \$223,362,000 sales. The chain figures shown in this report relate to all firms having four or more retail outlets with the exception of department stores and mail-order houses. All department stores and mail-order houses or offices are classified for census purposes as independents irrespective of the number of units operated by any one firm. The chain figures relate to corporate chains only. Voluntary chains in which the individual firms are independently owned but are combined for buying or advertising purposes are classified as independents rather than as chains.

In the food retailing field there were 722 chain units consisting of grocery or combination stores and these had sales of \$95,947,800 in 1941 or 42.1 per cent of the total sales of all such stores including both chains and independents. The corresponding ratio in 1930 was 39.8 per cent. There was but slight change in the proportion of the total drug store business transacted by chains, the ratio increasing slightly from 20.4 in 1930 to 21.1 in 1941. Ratios of chain to total sales in 1941 for other lines of business in which chains are important with corresponding ratios for 1930 in brackets are as follows: variety stores, 88.6 per cent (94.8 per cent); filling stations, 11.4 per cent (30.0 per cent); men's and boys' clothing and furnishing stores, 19.7 per cent (19.8 per cent); shoe stores, 43.6 per cent (21.5 per cent); and restaurants, 13.4 per cent (22.3 per cent).

Scope of Report

This report is one of a series presenting results of the Census of Merchandising and Service Establishments, 1941. This Census was taken by mail, the mailing list for the purpose having been prepared by the Population Census enumerators who were instructed to list the names and addresses of all business firms in their respective enumeration areas in June, 1941. Specially prepared schedules were mailed early in 1942 to all firms thus listed on which to report their business operations for the calendar year 1941 or the fiscal year conforming most closely with that period.

This report covers only the salient features of retail merchandising establishments and shows the number of stores, value of sales, annual payroll and year-end inventory for stores classified by kind of business. Figures are shown in detail for the province as a whole and for each city of 30,000 population or over. Figures in lesser detail are shown for each Census division and for each incorporated place of 1,000 population or over. The operations of these types of service establishments coming within the scope of the Census will be shown in a later report. A report on the wholesale trade will also be published. More detailed reports covering other phases of the retail trade are in the course of preparation.

Supplementary Reports

The results summarized in the preceding sections relate to regular established places of retail business. In addition, reports were received from a large number of persons who either had no established place of business or else did not devote their full time to retail trading. Reports were received from 4,353 such persons and these reported total annual sales for 1941 of \$5,819,500. Included in these totals were 1,074 farmers having agencies for the sale of commercial fertilizers and with sales of \$796,100. There were also 313 farmers with farm implement agencies and these had sales of \$658,600. Itinerant operators dealing in medicinal preparations, spices, etc., numbered 501 with sales of \$762,100. Agents for women's made-to-measure garments and itinerant vendors of fruits and vegetables formed the other most common types included in these supplementary figures.

Men's shoe stores	751	727	15,534,900	18,903,500		1,829,900	6,574,800

Figures for milk dealers, farm implement dealers and grain elevators excluded. See footnotes referring to these classifications.
Exclusive of manufacturing bakeries. Retail sales of manufacturing bakeries were reported at \$25,697,900 in 1941.
Exclusive of manufacturing dairies. Retail sales of manufacturing dairies were reported at \$18,678,900 in 1941.
Figures for 1930 include producer distributors of milk. Such distributors are not included in the 1941 Census.

Table 1. ONTARIO--Retail Merchandise Trade, by Kinds of Business--(Cont'd)

Comparison of Stores and Sales, 1930 and 1941. Payroll and Inventory, 1941.

An (n.c.) indicates that figures for 1930 and 1941 are not comparable due to differences in the scope of the Census for the two years.

Kind of Business	Number of Stores		Net Sales			Payroll 1941	Inventory Dec. 31 1941
	1930	1941	1930	1941	% Change		
Building Materials Group	2,072	2,002	\$ 61,963,100	\$ 67,169,900	+ 8.4	\$ 6,903,000	\$ 17,410,300
